## Explore Our Solar System

July 13 - 17

For students entering grades 6 - 8

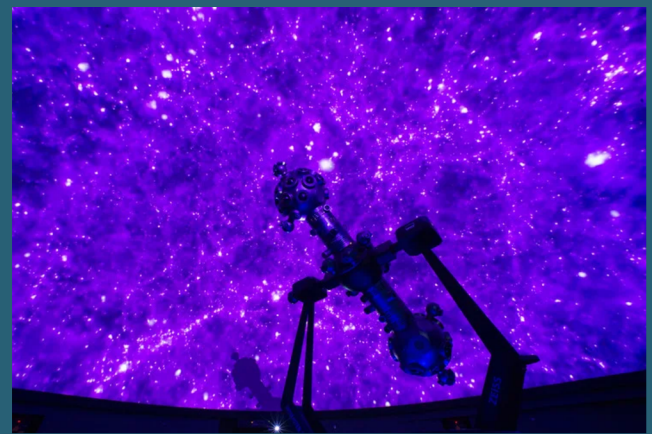

*Journey through space and time to discover how our solar system formed and evolved. Along the way, explore planets, moons, asteroids and more!*

## Build a Living World

July 27 - 31

For students entering grades 10 - 12

*How do planets and moons form and change? What could life look like on different worlds? Explore these questions and create your own imagined living world along the way.*
